MARCO ANTONIO RODRÍGUEZ TORRES
Tonala, Jalisco | +52 3317709591 | mrc5622@gmail.com

PROFESSIONAL PROFILE

Web Developer with a decade of experience building core business logic and solid backend architecture. Specialized in the **Python** ecosystem (**Django**, **FastAPI**, and **Flask**) and **Node.js** solutions, coordinating integration with frontend frameworks like **ReactJS**, **VueJS**, and **AngularJS**. Hands-on experience in relational and **NoSQL** database administration, **Docker** containerization, continuous integration/deployment (CI/CD), and cloud infrastructure management across **AWS** and **GCP** environments.

TECHNICAL SKILLS

- Languages & Frameworks: **Python**, JavaScript / **Node.js**, **Django**, **Flask**, **FastAPI**, **ReactJS**, **VueJS**, **AngularJS**.
- Infrastructure & Tools: **Docker**, **Git**, **AWS**, **GCP**, **CI/CD**, **Apache Kafka**, **Celery**.
- Databases: **PostgreSQL**, **MySQL**, **MongoDB**, **Oracle**.
- Methodologies: **SCRUM** / Agile, Software Architecture, Teamwork, Critical Thinking.
- Languages: **English** (Intermediate **B1**), Spanish (Native).

WORK EXPERIENCE

Ebunti | Backend Developer
2025 – 2026
- Architected core services using Django, FastAPI, and Flask as the main Python stack, ensuring system stability and scalability.
- Implemented Apache Kafka for data stream processing, cleaning, and ingestion into PostgreSQL and MongoDB.
- Configured Celery alongside Django to handle background tasks and lower API response times.
- Maintained and tuned PostgreSQL and MongoDB queries to ensure fast, reliable data access.
- Managed asset storage and general cloud resources utilizing AWS S3.
- Containerized microservices with Docker to standardize development and production environments.
- Integrated CI/CD pipelines to automate testing and release cycles.

Interfell | Backend Developer
2024 – 2025
- Managed event-driven data streams using Apache Kafka.
- Built and maintained backend microservices secured with OAuth and JWT protocols.
- Delivered continuous features across Python, FastAPI, Flask, PostgreSQL, AWS S3, MongoDB, and Docker.

IAD Mexico | Full Stack Developer
2022 – 2024
- Handled server and database administration to maintain high system availability.

- Developed REST APIs and microservices using Python (Django, FastAPI) and Node.js, enforcing OAuth and JWT security.
- Supported release cycles through Docker, AWS, and CI/CD pipelines on PostgreSQL.

Casas y Terrenos | Python Developer
2019 – 2022
- Handled server administration tasks and PostgreSQL database maintenance.
- Implemented backend modules in Python using Django and Flask.
- Maintained AWS infrastructure and containerized deployments using Docker and CI/CD tools.

Clivo, IT Dept. | Python Developer
2018 – 2019
- Configured and monitored databases and services across AWS and Google Cloud Services.
- Built and maintained backend software components on Python and Django integrated with PostgreSQL.

Inkuvi, IT Dept. | Python Developer / Full Stack Developer
2018 – 2019
- Handled backend and frontend web application development using Python (Django, Flask) and Node.js.
- Administered and maintained PostgreSQL and Oracle databases.
- Designed RESTful APIs with OAuth and JWT authentication, alongside writing automated test suites.
- Refactored legacy code and gradually migrated components to Docker containers on AWS and GCP.

Global Standards, IT Dept. | Fullstack Developer
2018
- Developed backend and frontend features using Python (ODOO), PHP (Laravel), MySQL, and Vue.js.
- Maintained legacy code, supported PostgreSQL and Oracle databases, and implemented test suites.

Gobierno del Estado de Tabasco, IT Dept. | Fullstack Developer
2015 – 2017
- Maintained PostgreSQL and Oracle databases, optimizing SQL queries and producing statistical reports.
- Supported Linux servers and maintained web applications built with Python and Django.

EDUCATION

Universidad Tecnológica de Tabasco
Bachelor's Degree in Information Technology
2010 – 2014
